

## About the Instructor . . .

### **William Smith**

As an associate with Monterey Technology Group, Inc's information security consulting practice, William Smith specializes in Windows and Active Directory security as it relates to compliance and IT audit. William has been a key participant in Monterey's Security Log Secrets certification program which provides interpretation guidance for the cryptic Windows security log and maps Windows security events to specific controls in various compliance frameworks including COBIT, ISO 17799 and FISMA. William is also the principal contributor to the compliance mapping section of Monterey's popular work programs for IT auditors. Before becoming a consultant, William worked at a multi-national organization as an IT security specialist on a variety of audit and monitoring projects focused on the Windows platform.
